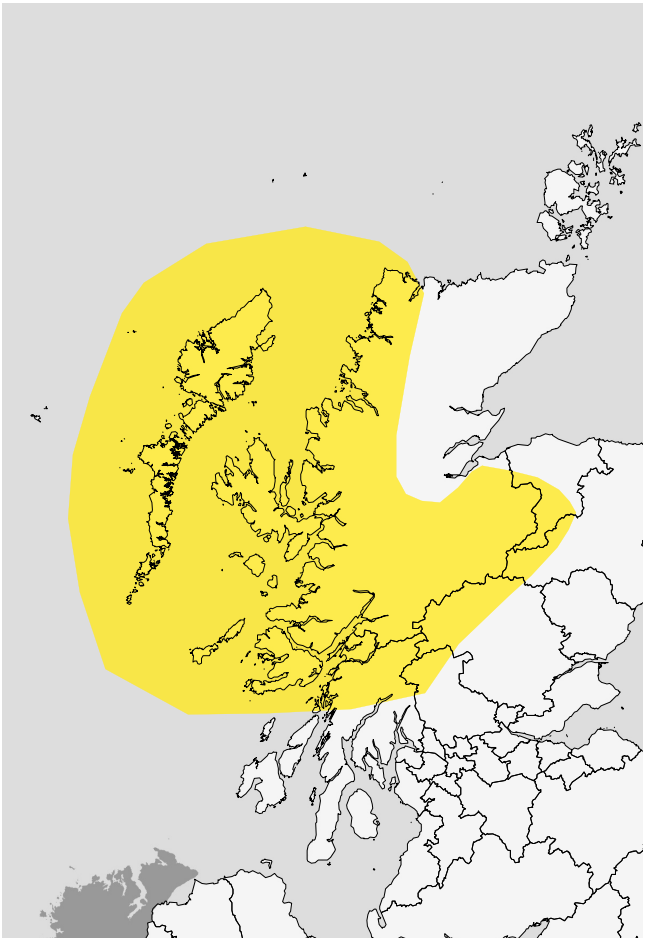
Yellow warning
**Wind**

Between
**05:00 Sat 23 Nov 2024** and
**17:00 Sat 23 Nov 2024**



## Storm Bert will bring strong winds for a time on Saturday, which may cause some disruption in places

### What to expect

- There is a small chance of injuries and danger to life from flying debris
- There is a slight chance of some damage to buildings, such as tiles blown from roofs
- There is a small chance of longer journey times or cancellations as road, rail, air and ferry services are affected
- There is a small chance that some roads and bridges could close
- There is a slight chance that power cuts may occur, with the potential to affect other services, such as mobile phone coverage
- There is a small chance that injuries and danger to life could occur from large waves and beach material being thrown onto sea fronts, coastal roads and properties

**17:00 Sat 23 Nov 2024**

## Further details

A period of strong southeasterly winds is likely for a time on Saturday, with peak gusts of 50-60 mph in many parts of the warning area, but 60-70 mph in some coastal areas and also locally to the lee (northwest) of high ground, and perhaps in excess of 70 mph along some exposed coasts.

What should I do?

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

People cope better with power cuts when they have prepared for them in advance. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

If you are on the coast, stay safe during stormy weather by being aware of large waves. Even from the shore large breaking waves can sweep you off your feet and out to sea. Take care if walking near cliffs; know your route and keep dogs on a lead. In an emergency, call 999 and ask for the Coastguard.

Be prepared for weather warnings to change quickly: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.

## Reason for update

Area reduced with strongest winds becoming confined to northwest of Scotland. End time brought forward to 1700.

Very low likelihood of medium impacts
